

UPGRADING TO R12

UPGRADE VALUE

ASSESSMENT

Patech Solutions Limited
www.patech-solutions.com

Features:

- Onsite assessment to examine your business process and how well your oracle software addresses them
- Recommendations for future steps
- Estimate of Oracle R12 upgrade costs
- Written report detailing our findings
- Assessment fee deducted from consulting costs if Patech performs your R12 upgrade

Benefits:

- Discover whether Oracle R12 will help achieve your business goals – before you invest significant time and money
- Learn ways you can streamline your work, tighten controls, and automate processes
- Find out which problems R12 will solve – and which it won't

The Upgrade Value Assessment

The Oracle E-Business Suite provides comprehensive automation across your enterprise because all the applications comprising the suite are engineered to work together.

However are you getting everything you need from your E-Business Suite ? Are you still completing processes manually that should be automated ? Can Oracle E-Business Suite R12 remove these issues ?

Confidence

Patech's highly experienced functional consultants can help identify the key benefits of your Oracle E-Business Suite quickly and cost-effectively.

Patech works closely with your organisation to determine if Oracle R12 is right for you. The Patech consulting division is skilled in reviewing your business processes to spot opportunities for streamlining work, tightening controls, and adding efficiencies that save time and money. Patech's assessment allows us to determine how well the next release will meet your organizations needs and to estimate your upgrade costs.

Answers to the Toughest Questions

Patech's functional consultants combine what they learn about your organisations business process flows with what they know about Oracle E-Business Suite R12 to address issues such as:

- Where do the current processes run into problems ? Can R12 address these issues ?
- Is your organisation generating the required reports for your system ? Can R12 make a difference ?

Oracle Certified Advantage Partner:

Patech Solutions Limited

Patech is an Oracle E-Business Suite delivery and managed service organisation which believes passionately in commercial and public sector well being by placing the back office process at its heart. Patech believes that knowing the problem is halfway to solving it. It's our business to deliver cost effective solutions for all customers.

Patech is Oracle's recommended partner for the implementation of the Oracle E-Business Suite. The company has extensive experience of assisting organisations to realise business benefits from the effective implementation of Oracle's E-Business Suite.

- Would you realise enough business benefits from the upgrade to warrant making it now ?

Business Benefit Investigation

Patech will provide the answers you need within a couple of weeks. Patech will liaise with key personnel involved in the corresponding business processes for each licenced Oracle module.

By walking through models of best practices in each functional area, Patech will learn how your practices conform to, or deviate from, the model. This process will help Patech to understand why your organisation does things the way you do and where problems are experienced. Patech will lookout for potential bottlenecks, and improvements.

Recommendations would be prepared by Patech on how your organisation may make the most of the Oracle technology and will provide feedback on whether upgrading to R12 is likely to bring sufficient business benefits.

The Upgrade Value Assessment report includes:

- A review of the Oracle infrastructure currently in place
- Recommendations on the ideal future state of your E-Business Suite
- An estimate of the costs of upgrading to Oracle R12
